

Quality policy:

Micro Technic A/S' goal is to deliver products, expertise and know-how in a quality and to the extent required by our customers and partners.

Through the introduction of ISO 9001:2015, Micro Technic A/S wants the current quality level to be constantly in focus and continuously improved, to the benefit of both customers and the company.

Environmental policy:

It is Micro Technic A/S' goal to limit the use of hazardous chemicals in our excipients and production. We will replace hazardous chemicals with more environmentally friendly products where possible or to try to change work procedure / working conditions for the benefits of our employees.

We want to minimize waste: Minimization of waste is attempted to be achieved by assessing methods for recycling / reprocessing.

Furthermore, Micro Technic A/S strives to purchase only components, consumables and chemicals that are RoHs approved, comply with REACH regulations and products that do not contain conflict minerals according to §1502 in Dodd-Frank-act.
