

## **Do you want to help create the future IoT-solutions at Micro Technic on Funen?**

*Senior Software Developer / Engineer*

*Micro Technic is looking for a skilled and focused employee for exciting software design and development to join us as soon as possible.*

*We have a large influx of many new Danish and international customers and projects, so we need a new employee for our development department.*

We work with many different solutions within IoT, industrial and embedded electronics as well as digitization of machines, products, and services.

With reference to our R&D manager, you will be responsible for software development for a number of our customers as well as for our own products (industrial IoT hardware, IoT platform and wireless sensor solutions).

We expect you to have experience in developing electronics. You will have a significant influence on the choice of platform and design of the products. Therefore, it is important that you are able to translate the customers' wishes and needs into concrete specifications for the customer's optimal solution.

What we expect from you

- has a relevant technical education and several years of experience in software development. You may be an engineer.
- is decisive, initiative-rich and can work independently.
- has good collaboration skills, is flexible and goal-oriented.
- has experience with embedded software, hardware-related code (firmware, system software, etc).
- In addition, it is a great advantage if you have experience in embedded Linux and ESP32.
- has good IT knowledge and preferably experience with project management tools, e.g. Open Project.

What we offer

- a committed team of skilled colleagues.
- a dynamic atmosphere with an informal tone.
- good stable working conditions.
- employee benefits in the form of health insurance and pension plan as well as good programs for further education and skills development.

For further information, please contact CEO Frank Max Laursen or R&D Manager Anders Qvistgaard Sørensen on tel. 66153000 or at [anders@micro-technic.com](mailto:anders@micro-technic.com) or [frank@micro-technic.com](mailto:frank@micro-technic.com)

We invite ongoing candidates for interview, so apply for the position as soon as possible via email to [jobs@micro-technic.com](mailto:jobs@micro-technic.com)

## **#jobsforukraine**

*Micro Technic A/S is a well-consolidated, internationally oriented company in progress. Dynamics, flexibility, and quality are key words for us, and skilled employees are a precondition for Micro Technic's continued development.*

*Micro Technic A/S develops and produces customer-specified electronics and appliances as a total supplier. We also develop and market our own products, such as industrial IoT devices and wireless sensor solutions supported by a newly developed IoT platform, as well as embedded products, which are sold through distributors and OEMs in the export market. The company employs approx. 50 employees.*
